

Syllabus for UWX AS100 Survey of Astronomy

NOTE: This syllabus document contains the basic information of this course. The most current syllabus is available in the full course.

Course Description

This is a descriptive survey of astronomy for students with minimal background in mathematics and science. Topics include the solar system, stars, galaxies, and cosmology, as well as the methods by which astronomers learn about the Universe and disseminate their discoveries. Students may not earn credit both for this course and for most other introductory astronomy courses. (Consult your home institution's course catalog or bulletin for specifics.)

Prerequisite(s)

This course has no college-level prerequisites; however, students are expected to have a solid grasp of high school math (through Algebra I). Although not math-intensive, this course does occasionally require: use of scientific notation; calculation of squares and cubes and their roots; and simple algebraic manipulation of equations.

Course Outcomes

Knowledge of the Natural World (NW): Courses focus on concepts and applications related to the natural and physical sciences and mathematics.

- Describe and evaluate existing knowledge of the natural world;
- Interpret, analyze, and communicate data, results, and conclusions;

Course Requirements/Components

Lesson Quizzes: 25%

Each of the 15 lessons has a corresponding checkup quiz. The lowest quiz score is dropped, and the remaining quizzes count equally (2% each).

Unit Tests: 30%

Each of the three units ends with an in-depth exam. All unit exams count equally and there is no final exam.

Projects: 25%

Five observing reports are assigned throughout the semester. They count equally.

Special Activities: 20%

Four activities that dive into different topics and offer opportunities for discussion are assigned throughout the semester. They count equally.
