Course Preview Week: May 19 - May 25, 2026

Semester Dates: May 26 - August 07, 2026

SMGT 750 The Built Environment

3

Credits

This course explores how the built environment came to be, and how it intersects with human needs such as water, air, food, waste, transportation, healthcare, and education. You will evaluate community design and what a sustainable community looks like, and study related technologies while evaluating alternatives and discussing unintended consequences. This course will include case studies.
